Generative AI Engineer · LLMOps & Agentic AI

+91 96891 15890 [◇ Pune, Maharashtra, India](#)

PROFILE SUMMARY

Senior AI/ML Engineer (Generative AI Engineer) with 4 years of experience architecting and deploying scalable Agentic AI systems, multi-agent orchestration, RAG pipelines, and real-time AI assistants. Proven expertise in LLMOps, semantic retrieval, prompt engineering, and LLM optimization using LangChain, LangGraph, and OpenAI APIs across AWS and Azure. Delivered production-grade, event-driven AI platforms that improved efficiency, accuracy, and decision-making. Patent holder for a voice-controlled AI assistant for visually impaired users.

SKILLS

Languages	Python, SQL
GenAI	RAG, Agentic AI, Semantic Search, Vector Search, Prompt Engineering, LLM Fine-Tuning & Optimization, Multi-Modal AI
Frameworks & Tools	LangChain, LangGraph, OpenAI API/SDK, Hugging Face Transformers, Gradio
AI/ML	PyTorch, TensorFlow, Scikit-learn, Vector DBs (ChromaDB, FAISS, Pinecone), GPT-4, LLaMA (Ollama), DALL-E 2, OpenCV, YOLOv7, OCR, NLP, SpaCy
Web Frameworks	FastAPI, REST APIs, Flask, Django, Streamlit
Cloud & DevOps	AWS (EC2, S3, Lambda), Azure (OpenAI, Functions, Service Bus, Blob Storage, DevOps), Docker, CI/CD, MLOps
Databases	MongoDB, MySQL, PostgreSQL, NoSQL

EXPERIENCE

Senior AI/ML Engineer Harbinger Group	July 2022 - Present Pune, Maharashtra
--	--

- **Architected** an event-driven automation platform using Python, Azure OpenAI, and Azure Functions, orchestrating Playwright-based test execution and AI-driven defect creation via Jira/Azure DevOps, Azure Service Bus, and Azure Blob Storage, improving execution throughput by **40%** and reducing QA effort by **60%**.
- **Engineered** a multi-agent AI system using LangGraph and OpenAI SDK, transitioning from single-agent to modular agent orchestration with role-based access control, vector search, OCR, and real-time streaming, improving response accuracy by **30%** and reducing latency by **25%**.
- **Built** an enterprise AI knowledge assistant using OpenAI SDK, delivering role-based, OCR-enabled real-time insights, reducing response time by **35%** and improving user satisfaction by **25%**.
- **Implemented** a LangChain-based RAG pipeline with recursive chunking, embedding generation, vector search (ChromaDB), query rewriting, and conversational memory, improving retrieval accuracy by **35%** and reducing hallucinations by **30%**.
- **Built a real-time contactless attendance system using YOLOv7** for face detection and **MediaPipe** for hand landmark tracking (21 key points) to enable gesture-based punch-in. Integrated backend validation APIs and deployed the system on AWS for scalable real-time processing.

EDUCATION

Bachelor of Engineering in Information Technology, Savitribai Phule Pune University (CGPA: 8.19) 2022

CERTIFICATIONS

Hugging Face (Transformers & NLP) · Google ADK (AI Agents & Multi-Agent Systems) · LangChain Deep Agents (Agentic AI, LangGraph, Tool-Oriented LLMs) · Microsoft Azure AI Fundamentals (Cloud-based AI Solutions) — 2025

PATENTS

Virtual Voice Assistant (Patented and Published) — App. No. 202221023236 Python (Computer Vision)

- **Invented** a hands-free voice assistant for visually impaired users covering meeting scheduling, file management, and navigation via speech; patented and published in India.
